

Human Risk Management for Healthcare

Healthcare organizations are no stranger to threats and cyberattacks. According to the U.S. Government's Office for Civil Rights, healthcare firms, on a broad scope, experienced nearly [400 data breaches](#) within the first half of 2023.

Because of the valuable data healthcare organizations have access to, healthcare remains a primary attack target for threat actors. And adversaries have their focus set on one primary attack vector—your doctors, clinicians, and administrative staff.

Research finds that 8% of employees cause 80% of security incidents. This small segment routinely demonstrate unsecure behaviors that open the door to worst-case cyber scenarios and vulnerable to attack. Elevate helps you find (and protect) these users before your adversaries do.

Identify and safeguard your riskiest people!

Elevate is helping healthcare organizations reduce their human risk. A global healthcare firm has experienced the following improvements:

Elevate drives measurable behavior change and security improvements

⤴ **24x**

Increase in **phishing email identification**

⤴ **2x**

Increase of **phishing reporting**

⤵ **30%**

Decrease of **malware events**

- Provides real-time visibility of user risk across the company, including board and audit-ready metrics on risk in specific attack factors
- Informs investment decisions across the security team
- Delivers tailored feedback to all employees to increase engagement and lower risk

What can Elevate Security do for your healthcare organization?

Elevate ingests and analyzes data from across your estate to identify and score individual cyber risk based on behaviors and attack history. Automated risk response enables use of interventions that drive real improvements to your overall security posture—and help turn your people into your greatest defenders!

“Our Dynamic Cyber Trust solution leverages the Elevate Security platform to create a uniquely scalable approach that holistically targets one of cybersecurity’s root causes of failure—people.”

—Andrew Turner, Executive Vice President, CTO, Global Commercial Business, Booz Allen Hamilton
